

# Tele Atlas MultiNet™ for MicroStation®

## Accurate, Detailed Maps with Regular Updates

Visit our web site at [www.adci.com](http://www.adci.com) to download a working sample.

### ADCi Supplied Formats

- MicroStation J (.dgn)
- MicroStation SE (.dgn)
- MicroStation 95 (.dgn)

### Coordinate System Options

- Universal Transverse Mercator (UTM)  
NAD27 meters, NAD27 feet,  
NAD83 meters or NAD 83 feet
- State Plane Coordinates (SPC)  
NAD27 feet, NAD83 meters  
or NAD83 feet
- Latitude/Longitude
- Others

### Geographic Coverage

Available for the 48 contiguous United States and Hawaii as 7.5 minute quadrangle files without attribute information.

### Accuracy and Currency

MultiNet maps comply with National Map Accuracy Standards for 1:24,000 scale maps for urban areas and are updated annually. Rural areas comply with 1:100,000 scale map standards.

### Suggested Uses

- Civil and environmental engineering
- Fiber optic telephone design
- CATV design
- Airport noise studies
- Site selection
- Demographic studies
- Presentations

MultiNet is a detailed vector map developed by Tele Atlas N.A.

(formerly known as Etak). ADCi

configures the maps to work with MicroStation and adds double-line roads. ADCi designs map features for easy identification. MultiNet is highly accurate in metropolitan areas. Updates, which are primarily in urban areas, may include roads, road names, address ranges and ZIP code boundaries.

### ADCi Enhancements

- Includes separate variable-width single- and double-line road files
- Additional 0 weight centerline road file available at no charge
- Area water and park features drawn as closed polygons with hatching
- Road, landmark, rail and water features have cartographically placed names
- Specify FOCUS leveling if desired
- **Custom road widths available**

### Design Files & Levels

ADCi extracts and organizes related features into design files with appropriate symbol classification.

#### County Files

Single-line roads roads.dgn  
Double-line roads roads2.dgn

14 classifications including street, roads, highways, arterials, collectors and light duty

Hydrography hydro.dgn

International State  
Regional Local

Boundaries boundary.dgn

MCD (minor civil division)  
CDP (census designated place)  
CNTY (county)  
MSA (metropolitan statistical area)

Misc. Transportation misc.dgn

Airports

Landmarks landmark.dgn

Such as schools, government buildings, churches, airports and parks

Railroads rail.dgn

ZIP Codes zip.dgn

#### Quad Files

Roads ...a.dwg & z.dgn RD

Hydrography ...b.dgn HY

Misc. Transportation ...c.dgn MT

Political Boundaries...h.dgn BND

ZIP Boundaries...i.dgn ZIP

Landmarks...l.dgn LMK

Railroads ...j.dgn RR
