

ADC WorldMap Digital Atlas

The leader in providing comprehensive, current and seamless geographic data for the entire world.

With numerous detail rich layers, including cities, major highways, national borders, and more than 4000 subnational boundaries, for 254 countries around the globe, ADC WorldMap Digital Atlas is an excellent choice for a wide variety of applications requiring 1:1,000,000 scale vector maps. ADC WorldMap is organized so customers can easily use ESRI or MapInfo software to perform a variety of desktop mapping activities. ADC WorldMap Digital Atlas provides customers with high-quality screen graphics and produces excellent printed maps for presentation purposes.

Creating a competitive edge for your business

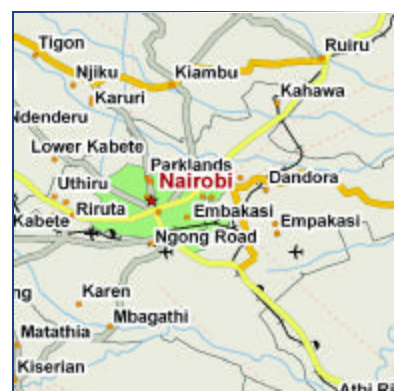

ADC WorldMap Digital Atlas has proven to be an indispensable asset for decision-makers in fields as diverse as economic studies, education, risk management, assets tracking, and other GIS applications. ADC WorldMap provides a basis for a variety of international applications such as:

- Risk management for insurance companies
- Location-centric applications
- Economic research for use at universities
- Ocean vessel tracking
- Monitoring weather and lightning activity
- Bird migration analysis

ADC WorldMap: A Partner for Maporama

Maporama International (www.maporama.com) has integrated ADC WorldMap's cartographic data into their Internet-based application. This partnership allows Maporama International to reinforce its leadership in terms of cartographic coverage to provide critical applications (fleet management, store locators, solutions for mobile professionals, location-based services etc.) with the most accurate information available on the market.

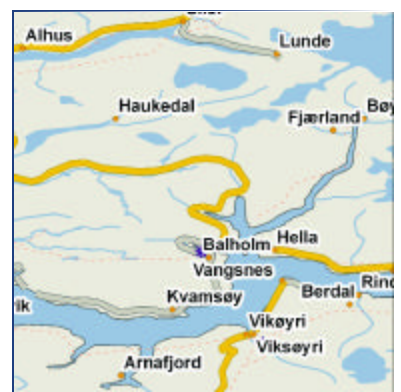

Maporama International chose ADC WorldMap for the high accuracy and quality of its mapping products and services.
