

The Most Complete and Accurate Database for All Your Government Geospatial Applications

ENABLING BETTER SOLUTIONS TO HOMELAND SECURITY, EMERGENCY MANAGEMENT, E-911 SERVICES, CRIME ANALYSIS, LAND MANAGEMENT, GIS MAPPING, AND MORE!

It's all about data that's accurate. NAVTEQ offers a digital road map that is unrivaled in its depth, richness and accuracy. For government agencies, the ability to quickly access spatial information to both plan for emergencies and to sustain community development constitutes vital government services. With NAVTEQ maps, you can be assured of precision data products that enable government organizations to deploy powerful and innovative solutions for complex and ever expanding needs.

The ADCi Difference!

NAVTEQ maps are provided by American Digital Cartography, Inc. (ADCi), in GIS formats and in any coordinate system. They are available by the **county, state**, or for the entire U.S. ADCi delivers NAVTEQ products that are edge-matched to **fit together seamlessly**. Several licensing options exist, including perpetual, that allow users to subscribe to annual or quarterly updates.

Massachusetts Selects NAVTEQ Data for Enterprise-wide License

NAVTEQ has been selected by the Commonwealth of Massachusetts through an agreement with ADCi, to provide an enterprise-wide license that allows use of NAVTEQ base maps and associated address range data at any of the over 300 agencies that are part of the Commonwealth-wide license! *This agreement is an attractive model for other State agencies to consider in meeting their digital street centerline needs.*

Supporting Federal, State and Local Government

NAVTEQ maps are designed to support the needs of Federal, State and Local agencies in implementing emergency response planning and incident reporting, evacuation planning, hazardous material tracking, crime analysis applications, homeland security and more!

The NAVTEQ block-address-ranges support the FCC mandate for identifying latitude and longitude of mobile 911 calls. And because NAVTEQ **continually updates its street network database**, you are assured of the most recent changes to road infrastructure, specifically in high growth areas and inter-city areas where navigation is critical.

NAVTEQ for Your Application

To ensure maximum flexibility, efficiency and cost effectiveness, NAVTEQ offers three data products: Base, Standard and Premium. If your application involves display, geocoding or routing NAVTEQ has a product to meet your needs. No matter which you choose, you'll be leveraging the most accurate street network database in North America!

One Powerful Tool Assisting Government GIS Applications

Representative Road Network Attributes

(up to 150 per link)

Address Range	Lane Category
Administrative Area Info	Postal Code
Alias, Exonym & Synonym	Restricted Driving Maneuvers
Boat and Rail Ferry	Road Construction
Bridge and Tunnel	Sign Text
Controlled Access Road	Speed - actual & categories
Direction of Travel Info	Street Name
Divider Type	Toll Both
Functional Class	Traffic Locating Coding
Gate	Z-Level

Representative Points of Interest (POIs)

(over 1 million POIs in North America, including:)

Airport	Park and Ride
Border Crossing	Parking Garage
Bus Station	Parking Lot
Commuter Rail Station	Petrol Station
Ferry Terminal	Police Station
Golf Course	School
Historical Monument	Sports Complex
Hospital	Tourist Attraction
Hotel	Train Station
Marina	

Download FREE Samples

You can see the NAVTEQ difference for yourself, by downloading **FREE** samples from the ADCi web site at www.navteq.adci.com. On the left hand side of your screen you will see a link "Click Here for Free Sample Data". Simply follow the prompts after clicking on that link. We are sure you will agree that NAVTEQ is the finest digital Road Network map database available!
